

COVID-19 daily deaths, Iran, IHME

reference scenario; model v3 and v4: without and with correction for death under-reporting

COVID-19 daily deaths, Iran, IHME minus JOHN smooth

reference scenario; model v3 and v4: without and with correction for death under-reporting

Daily deaths IHME minus JOHN smooth

----- IHME model v3

———— IHME model v4

COVID-19 daily deaths, Iran, IHME divided by JOHN smooth

reference scenario; model v3 and v4: without and with correction for death under-reporting

Daily deaths IHME divided by JOHN smooth

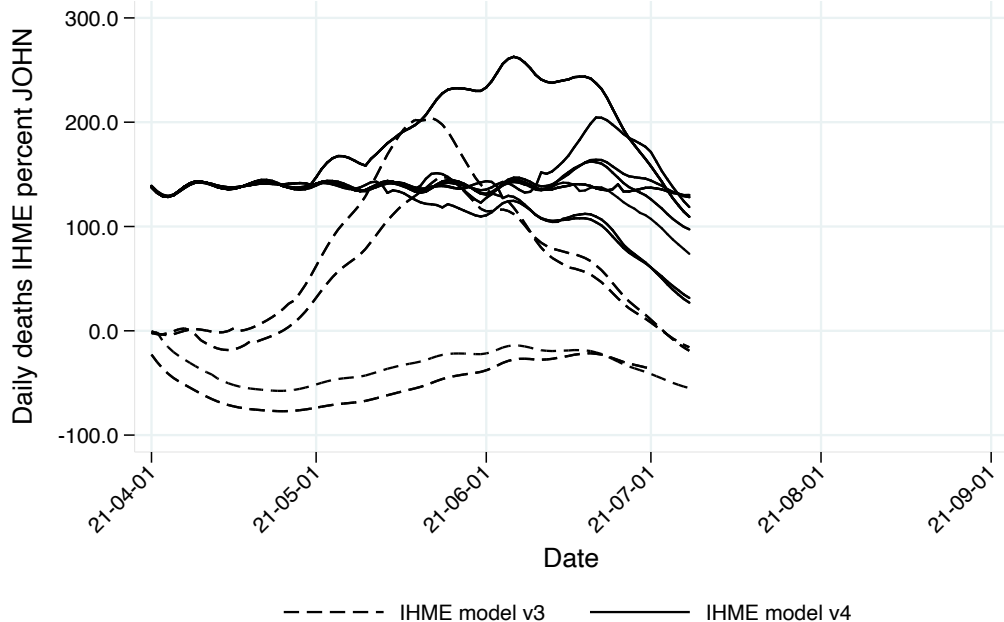

----- IHME model v3

———— IHME model v4

COVID-19 daily deaths, Iran, IHME percent JOH

reference scenario; model v3 and v4: without and with correction for death under-reporting

COVID-19 daily infections, Iran, IHME

reference scenario; model v3 and v4: without and with correction for death under-reporting

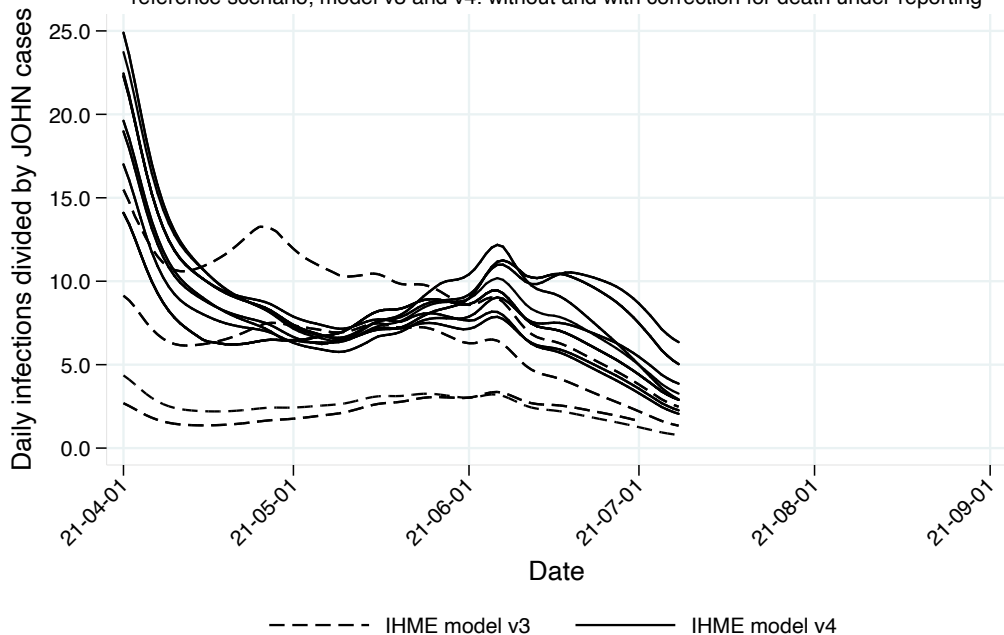

COVID-19 daily infections, Iran, IHME infections minus cases JOHN

reference scenario; model v3 and v4: without and with correction for death under-reporting

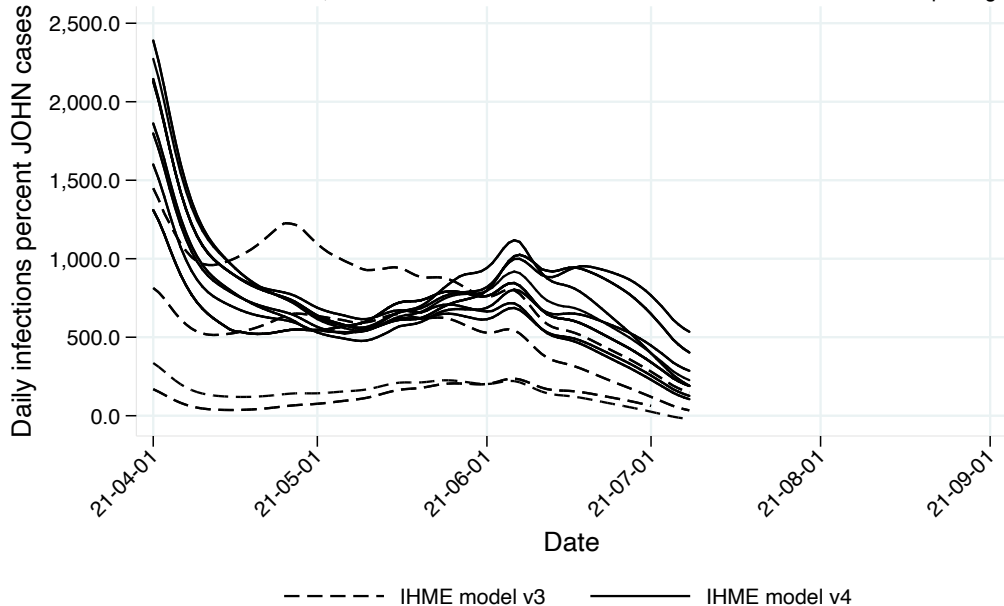

COVID-19 daily infections, Iran, IHME infections divided by JOHN cases

reference scenario; model v3 and v4: without and with correction for death under-reporting

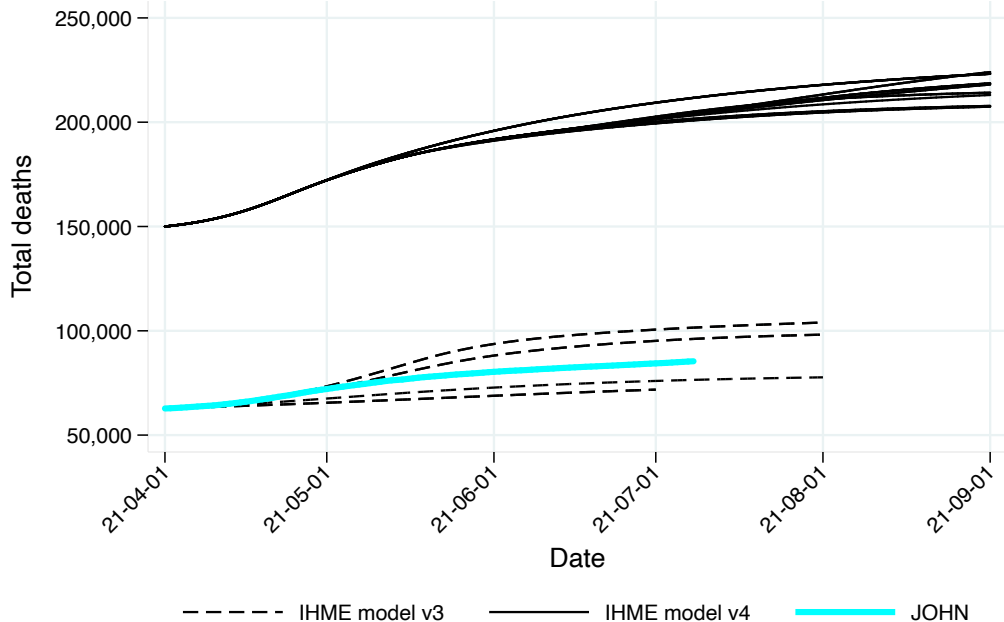

COVID-19 daily infections percent, Iran, IHME percent JOHN cases

Daily infections percent JOHN cases = 100 (IHME infections minus JOHN cases) / JOHN cases
reference scenario; model v3 and v4: without and with correction for death under-reporting

COVID-19 total deaths, Iran, IHME

reference scenario; model v3 and v4: without and with correction for death under-reporting

COVID-19 total deaths, Iran, IHME minus JOHN

reference scenario; model v3 and v4: without and with correction for death under-reporting

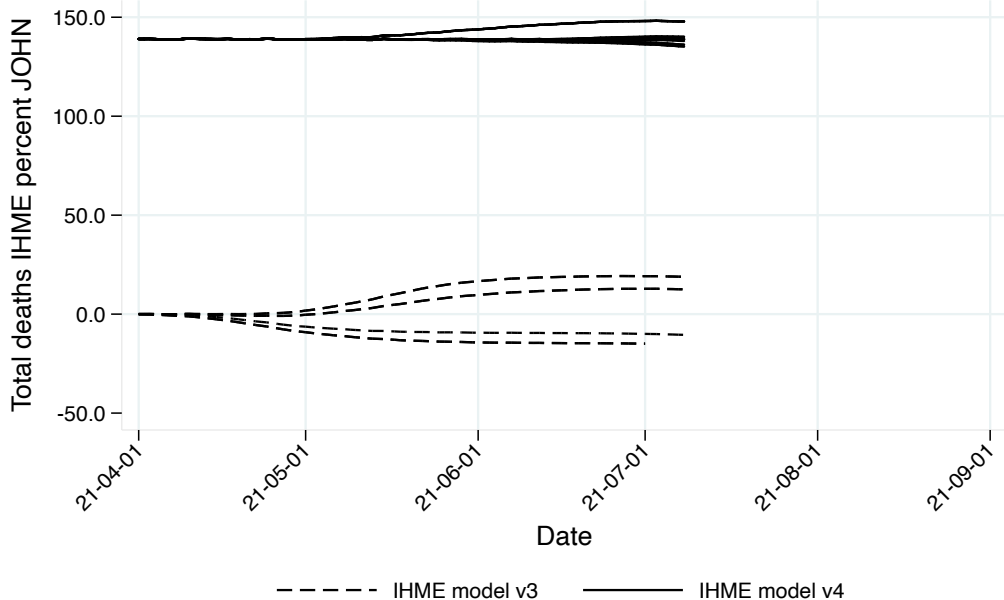

COVID-19 total deaths, Iran, IHME divided by JOHN

reference scenario; model v3 and v4: without and with correction for death under-reporting

COVID-19 total deaths, Iran, Total deaths IHME percent JOHN

Total deaths IHME percent JOHN = 100 (IHME deaths minus JOHN deaths) / JOHN deaths
reference scenario; model v3 and v4: without and with correction for death under-reporting

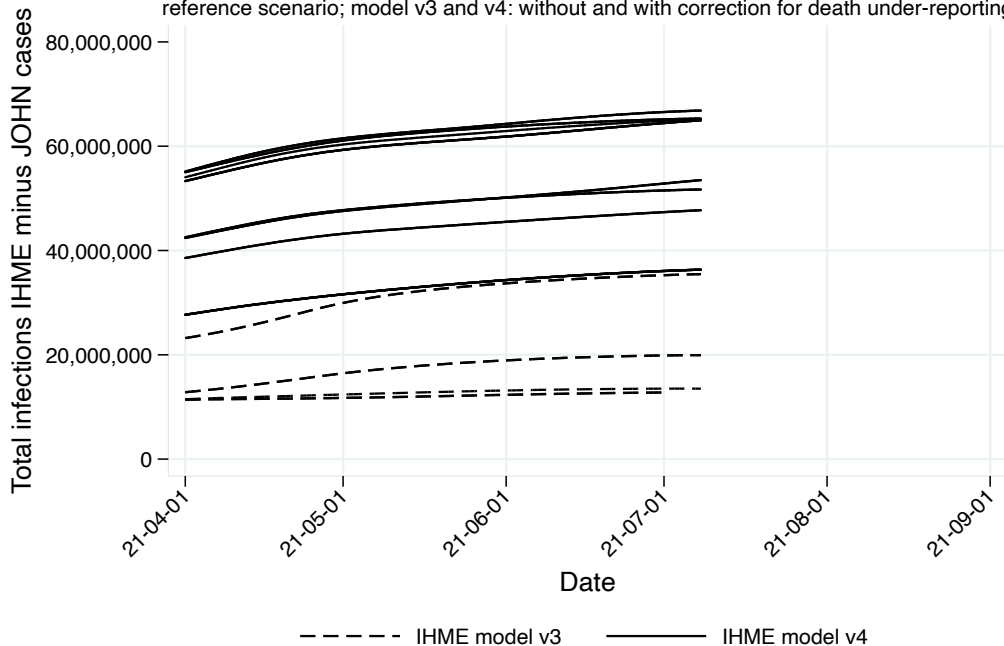

COVID-19 total infections, Iran, IHME

reference scenario; model v3 and v4: without and with correction for death under-reporting

COVID-19 total infections, Iran, infections IHME minus cases JOHN

reference scenario; model v3 and v4: without and with correction for death under-reporting

COVID-19 total infections, Iran, infections IHME divided by cases JOHN

reference scenario; model v3 and v4: without and with correction for death under-reporting

Total infections IHME divided by JOHN cases

----- IHME model v3

————— IHME model v4

COVID-19 total infections, Iran, IHME percent JOHN cases

Total infections IHME percent JOHN cases = 100 (IHME infections minus JOHN cases) / JOHN case reference scenario; model v3 and v4: without and with correction for death under-reporting
