Dear Dr. Najafi,

Thank you for your kind and thoughtful attention and for sharing the Reports with the National Epidemiology Committee. I will continue to share the periodical situation reports. Your support is precious.

Dear Dr. Yunesian,

I am glad to learn that you are now in charge of the National Epidemiology Committee. As you kindly advised about the reasons why the predictions of the international models for Iran and the reality happening on the ground in our country may not be aligned – like the large-scale gatherings and movements of population that are not captured in the models – the potential solutions to solve such misalignments might be worth considering if discussed so. I will be glad to be advised about your opinion.

if discerned so. I will be glad to be advised about your opinion.

Dear Dr. Asadi Lari,

I extend my most sincere thanks to you and appreciate your immense role in leading the Ministry's international relations. Surely your contributions to the well-being of the people shall never cease. You are the prime mover of these situation reports and their use by the Ministry.

Dear all,

I will be grateful to know your advice, including suggestions about making these Situation Reports serve their purpose better.

Best regards,

Farshad Pourmalek

Dear Dr. Pourmalak

Thank you for sending regular reports on the covid-19 situation report in Iran. I forwarded this email to Dr. Younesian who is not in charge of the National Epidemiology Committee. I believe that such reports are very helpful and informative and hope to present the latest update next week in National Scientific Committee.

Regards

Farid Najafi MD PhD
Epidemiologist
Deputy Minister of Research and Technology

Honourable distinguished scientists,

I am a physician and epidemiologist who has worked at the University of British Columbia, University of Washington, WHO, UNDP, and UNICEF.

Please see the attached "**Global COVID-19 epidemic models situation report** No 07 – 2021-09-23.pdf"

International and periodically updated models included are DELPHI (Cambridge), IHME (Seattle), Imperial College (London), Los Alamos (Los Alamos), and Srivastava (USC, Los Angeles).

All the material for the global level is available at a GitHub repository I created here <https://github.com/pourmalek/CovidVisualizedGlobal>.

I have shared similar Situation Reports for Canada (<https://github.com/pourmalek/CovidVisualizedCountry>) and Iran (<https://github.com/pourmalek/covir2>).

The objective is to *facilitate* the review of the predictions of the COVID-19 epidemic models for the technical advisors to the decision-makers.

Thank you,

Farshad Pourmalek

The Honourable Deputy Prime Minister,

The Honourable Ministers of Health,

Chief Public Health Officer of Canada,

Chief Provincial Medical and Public Health
Officers,

I am a physician and epidemiologist who has
worked at the University of British Columbia,
University of Washington, WHO, UNDP, and

University of Washington, WHO, CDC, and UNICEF.

Please see the attached 11th situation report of **predictions of the COVID-19 epidemic trajectory in Canada at the national and province levels** in the next three months.

I have created and shared these summary situation reports for Canada and provinces using the results of five international and periodically updated COVID-19 epidemic studies since July 2021, with recent addition of the PHAC-McMaster model since September 2021.

The objective is to *facilitate* the review of the predictions of the COVID-19 epidemic models for the technical advisors to the decision-makers.

All the material is available at <https://github.com/pourmalek/CovidVisualizedCountry>.

Thank you,

Farshad Pourmalek
